Fisheye Network Camera

Ultra Megapixel · 12MP CMOS Sensor · 360° Surround View · PPTZ · 360° 10 Meter IR · Smart IR · 3DNR · IP66 · IK10 · Pixel Calculator

VIVOTEK's FE8191 and FE8391-V are market-leading Ultra-Megapixel fisheye fixed dome network cameras, both featuring a detailed 12-Megapixel CMOS sensor which guarantees superb image quality. Equipped with a 1.5 mm fisheye lens for 180° panoramic view (wall mount) or 360° surround view (ceiling/wall/floor mount) with zero blind spots, the cameras are able to provide total coverage of wide, open areas, such as airports, shopping malls, parking lots, retail stores, offices and more.

The FE8191 and FE8391-V are both equipped with a removable IR-cut filter and WDR Enhancement technology, which allows the cameras to maintain optimal image quality around the clock and unparalleled visibility under high-contrast lighting environments. 3D Noise Reduction technology enables the cameras to capture clear, polished video under low-light conditions. Plus, both are compatible with VIVOTEK's Panoramic PTZ solution, allowing users to simultaneously monitor an area overview from a fisheye model while providing a detailed regional view from a speed dome camera.

In addition, the FE8391-V uniquely features built-in IR LEDs, making this camera the world's first Ultra-Megapixel fisheye network camera with IR illumination. With its patent-protected light cup, the FE8391-V provides highly uniform 360° surround illumination for clear viewing up to 10 meters, even in completely dark environments.

Finally, securing your investment, the FE8391-V is designed with vandal-proof IK10-rated and weather-proof IP66-rated housing which guaranty the camera's durability even in the harshest environmental conditions or where vandalism is a problem.
